Executive Overview & Metrics

EXECUTIVE SUMMARY

TOTAL GROSS SPEND

\$233,081

Generated across 3,900 individual retail customer orders.

AVERAGE BASKET SIZE

\$59.76

Remarkably steady spending with a standard deviation of \$23.69.

REPEAT PURCHASE INDEX

25.4

Average previous transactions per customer across brand lifetime.

OVERALL CSAT RATING

3.75 / 5.0

Consistent customer feedback across all categories and seasons.

Key Finding: Consumer spending exhibits strong baseline consistency across all age brackets and seasons (\$58–\$61 average order value). However, substantial margin leakage exists due to an untargeted 100% discount correlation in subscriber cohorts and an unaddressed gender gap in membership adoption.

Customer Demographics Profile

DEMOGRAPHICS

Substantial Male Volume Dominance

Male consumers generate 67.7% of total revenue (\$157,890), while female consumers represent 32.3% (\$75,191). Yet both genders exhibit nearly identical transaction sizes: \$60.25 for females vs. \$59.54 for males.

Balanced Generation Representation

Adults aged 31–60 form the primary purchasing core (57% of transactions). Young adults (18–30) and seniors (61–70) show parity in average spend (\$60.36 vs \$59.70), demonstrating broad multi-generational appeal.

Balanced Geographic Footprint

Transactions span all 50 states, led by Montana (\$5,784), Illinois (\$5,617), and California (\$5,605). No single state dominates above 2.5% of overall sales volume.

Revenue Share by Category

MERCHANDISING

Clothing 1,737 units sold • Tops, bottoms, dresses	\$104,264 44.7% Revenue Share
Accessories 1,240 units sold • Jewelry, sunglasses, belts	\$74,200 31.8% Revenue Share
Footwear 599 units sold • Sneakers, boots, sandals	\$36,093 15.5% Revenue Share
Outerwear 324 units sold • Jackets, coats	\$18,524 7.9% Revenue Share

The Subscription Dilemma

PROGRAM ECONOMICS

Zero Female Subscription Uptake

Systemic Gap

0.0% Female Adoption

While 39.7% of all male customers (1,053 shoppers) are enrolled as active subscribers, exactly zero female shoppers (0 of 1,248) have joined the subscription tier.

This indicates either a complete absence of female-targeted onboarding funnels, or an enrollment incentive program positioned solely toward male product categories.

100% Promo Code Subsidization

Margin Erosion

100.0% Discounted

100% of subscribers received a promotional discount on their order, compared to only 21.9% of non-subscribers. Every single discount utilized a promo code.

Despite heavy subsidies, subscribers averaged \$59.49 per order versus \$59.87 for non-subscribers, showing zero basket expansion from current discount tiers.

Promotion & Frequency Dynamics

BEHAVIORAL INSIGHTS

Core Apparel Staples Drive Top GMV

Blouses (\$10,410), Shirts (\$10,332), Dresses (\$10,320), and Pants (\$10,090) generated the highest gross receipts, proving that everyday wardrobe items sustain top-line revenue.

Uniform Tenure Across Frequencies

Customers purchasing weekly possess an average of 25.8 prior transactions, compared to 24.6 for annual shoppers. Frequency reflects immediate use-case rather than customer lifetime loyalty.

Discount Decoupling Opportunity

Non-discounted shoppers generate identical review ratings (3.76 vs 3.74). Price discounting does not boost customer satisfaction, creating room to protect baseline margins.

Merchandise Performance Matrix

CATEGORY FINANCIALS

CATEGORY	VOLUME (UNITS)	GROSS SALES	AVG ORDER VALUE	TOP SIZING	PRIMARY FULFILLMENT	CSAT SCORE
Clothing	1,737 units	\$104,264	\$60.03	M (45%)	Free Shipping (18%)	3.72 / 5.0
Accessories	1,240 units	\$74,200	\$59.84	M (44%)	Standard (17%)	3.77 / 5.0
Footwear	599 units	\$36,093	\$60.26	M (45%)	Express (18%)	3.79 / 5.0
Outerwear	324 units	\$18,524	\$57.17	L (29%)	Store Pickup (19%)	3.75 / 5.0
Portfolio Total	3,900 units	\$233,081	\$59.76	M (44.9%)	Balanced Distribution	3.75 / 5.0

Fulfillment & Customer Rating

OPERATIONS

Operational Takeaway: Demand is evenly distributed across all 6 shipping methods (each capturing 16% to 17% volume). Standard delivery yields the highest CSAT rating (3.82), while expedited modes do not generate satisfaction premiums, suggesting delivery reliability outweighs raw transit speed.

Omnichannel Purchase Journey

CUSTOMER CHANNELS

Payment Frictionlessness

Payment preferences are exceptionally well-distributed across PayPal (17.4%), Credit Card (17.2%), Cash (17.2%), and Venmo (16.3%). Checkout conversion faces zero payment method friction across all customer segments.

All-Season Consistency

Revenue flows steadily across all quarters: Fall (\$60,018), Spring (\$58,679), Winter (\$58,607), and Summer (\$55,777). Average ticket size peaks in Fall (\$61.56), presenting an ideal window for high-ticket outerwear bundles.

Sizing & Palette Breadth

Medium (45.0%) and Large (27.0%) comprise 72% of all inventory turnover. Demand is distributed broadly across 25 distinct hues, led by earthy Olive (177 purchases), vibrant Yellow (174), and metallic Silver (173).
